ANALOG REMOTE I/O BLOCK  
( SynqNet Enabled Analog I/O )

**THE TA805 SYNQNET REMOTE ANALOG I/O BLOCK** from Trust Automation completes SynqNet distributed networks by providing SynqNet enabled Analog Input, and Output. It is designed for easy terminal breakout block free installation into OEM machines.

The standard configuration offers eight (8) Analog inputs, and four (4) Analog outputs using industry standard high density D-Sub connectors. Simple cabling provides a direct connection I/O system while maintaining the lowest cost possible.

The Trust Automation family of SynqNet products allows traditional Drives, Digital I/O and Analog I/O to be integrated together into a SynqNet Industrial Distributed Motion Network.

By incorporating this flexible interconnect architecture into a SynqNet network, custom connections and features can be developed for specific applications.

### FEATURES

- SynqNet Network
- (8) Differential Analog Inputs
  - Bipolar or Unipolar Input
- (4) Differential Analog Outputs
  - Bipolar Output of  $\pm 10V$
- Complete Status LED's For SynqNet
